EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

After the title of invention at the top of Page 1 of the specification, please insert the following:

--- This is a divisional application of U.S. Application No. 09/647,504, filed February 28, 2001, now U.S. Patent Number 6,667,065, which is a national stage application of PCT/IB99/00649, filed March 30, 1999, which claims priority to Denmark Application No. DK 0457/98, filed April 1, 1998. ---

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

This application is a Divisional of parent application number 09/647,504. A restriction requirement was made in the parent application, where the first group was primarily directed to a method of making a bread product with an amylase, and where the second group was directed to a bread improver composition for doughs, and an amylase. Through prosecution of the first group of claims, subsequent amendments and evidence of record provided for allowable claims, as now found in US PAT 6,667,065. While still considered patentably distinct inventions, the currently pending claims 23-42 are commensurate in scope with the allowed claims in the parent application, regarding the type and activity of the non-maltogenic exoamylase. As the activity of the enzyme was at issue in the parent, and its use within a dough or bread product system, and since this was resolved on the record in the parent

Art Unit: 1761

application, the instant claims are also allowable over the prior art, for the reasons established on the record in parent application 09/647,504. Specifically, the amylase IV enzyme of Min et al. (of record) has been demonstrated to not be an exoamylase, and thus the activity could not anticipate or make obvious the instantly-claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
